WHY BALTIC ELECTRONICS CONFERENCE?

BEC's history traces back to 1996; the aim of the conference is to promote research and development in the field of electronics and embedded systems, particularly in the Baltic Sea region.

In the 2020s, BEC has been refocused to green, dependable and sustainable electronics, in keeping with EU and Estonian strategic priorities. These technologies help address major global challenges that humanity is facing: climate change, urbanization, health and well-being...

As an industry sponsor of BEC...

- You gain the opportunity to showcase your products and services, connect with technical talent, and strengthen your visibility within the academic and innovative electronic ecosystem
- You get qualified access to electronics #deeptech R&D in Estonia
- You find a platform for networking with electronics experts in the Baltics and Nordics
- You'll gain insight into latest trends and developments in Estonia and Baltics region in electronics and embedded systems – helps find a market-fit for your products and services
