

## **How do you register for Lloyd's List?**

To create a Lloyd's List user account, the computer or other device must be connected to the TalTech network (remote access via [FortiClient VPN](#)). While on the Lloyd's List website, click the "Sign In" link. To create an account, click the "Don't have an account yet? Register here" link at the bottom.

When registering, use your taltech.ee email address as the username and create a password containing at least 8 characters. In the "Company" field, enter "Tallinn University of Technology". After entering the required information and clicking "Register", you will receive an email containing a confirmation link. To complete the account creation process, it is important to click the link provided in the email and, after reviewing your information, click "Complete registration".

You will then be asked to select topics of interest. After confirming your selections, you will be asked once again to verify your email address. Click "Resend". Open your mailbox and click the "Verify Your Email" link. Lloyd's List is now ready for your use.

Once the account has been created, you will later be able to log in to Lloyd's List even outside the TalTech network.
